

# Imageworks 3D

*your space, virtually*

## Google Streetview

360 Panoramic views can be published to Google Streetview

This is great as it allows anyone to find you on Google Maps and explore your premises. It does not provide the same in depth 3D experience as the Walkthrough since only panoramic images can be published at this time, not the full 3D scan. Google do charge for each upload and so this service is not included in the standard cost but is available as a chargeable extra.

NOTE: This option is not permissible for residential properties.
